

NEW! HCP 3000 Series **Unrivaled Power,** **Unmatched Efficiency**

The new HCP 3000 Series pumps are the game changers in commercial pump performance and versatility. Engineered for heavy-duty durability, they set a new standard of flow rate for the 3" union class. A wide range of power options, including single or variable speed, means you can provide the optimum solution for virtually any pool, delivering maximum performance and uncompromised efficiency.

Best in Class Performance. HCP 3000 Series pumps are the first 3" pumps to achieve hydraulic efficiency of more than 250 gallons per minute at 60' head (7 HP 60HZ model), saving more energy than any comparable pump on the market.

Longer Life and Lower Maintenance. TEFC motors in all models – plus a chemical-resistant Viton[®] seal means less wear-and-tear and dramatically reduced down-time. Oversized strainer baskets reduce daily cleaning and maintenance.

Simple, versatile installation. The wide variety of power options and the detachable, modular strainer basket mean HCP 3000 Series pumps deliver unmatched versatility, allowing for simple installation in virtually any pool application.

Available in 3HP to 7HP in 50/60HZ the Hayward Series 3000 pump is a perfect match to trusted and proven Hayward tandem systems. Both products are manufactured in the United States at the Hayward Clemmons, North Carolina main manufacturing facility.

NEW! Water Features **by Hayward Bring** **Beauty to Every Pool**

Bring the beauty of moving water to your customer's backyards with Hayward's new family of water features.

Deck Jet 500

From cascades and geysers to deck jets, Hayward water features are designed for seamless integration with any pool and spa.

Bubblers

Sheer 500

Contact Hayward IMG for further details on Hayward's new water feature selections.

NEW! Saline C™ 11.0 Commercial Salt Chlorine Generator

Hayward Commercial Pool unveils and "big brother" to the Saline C™ 6.0. With the new Saline C 11.0 Hayward's newest commercial salt chlorinator produces up to 11 pounds of pure chlorine per day.

Just like the Saline 6.0 the 11.0 is a NSF certified commercial salt chlorine generator that features low cost installation with an energy efficient power supply that offers amazing water quality with lower operating cost without "daisy chaining" multiple cells for greater output.

Designed to meet the needs of commercial applications that benefit by the operation of a salt-chlorinated pool and lowering sanitization costs by up to 60%.

Hayward AquaNaut® 200 and 400 Suction Cleaners

AquaNaut® 200 & 400 automatic suction pool cleaners are designed with unique patented technologies to deliver a thorough and reliable clean for pools of different shapes, finishes, flow rates and debris types.

AquaNaut 200

Available in two or four wheel drive models, AquaNaut features patented self-adjusting variable vanes known as V-Flex™ technology.

Because the variable vanes automatically adjust to allow for large debris to pass through the cleaner, V-Flex technology delivers maximum power even at lower flow and provides peace of mind for clog-free cleaning – covering pool floor, walls and steps.

Available for tile pools with special "tape" wheels. Contact Hayward/IMG for further details.

ProHayward Transformers Available for Immediate Shipment

ProHayward low voltage swimming pool transformers are the preferred transformer around the world.

12V/300W ProHayward Transformer

CE listed ProHayward transformers are designed to provide safe 12 volt electrical supply to underwater lights and low voltage fixtures of all types.

Advanced circuit protection resets automatically. The weatherproof housing features a separate wiring compartment for the fully encapsulated high and low voltage circuits.

Available in 300 & 600W as well as 12, 13 & 14V configurations.

ProHayward transformers complement Hayward lighting choices.

For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: img@hayward.com or go to www.Haywardpool.com
