

Hayward's New ColorLogic Laminar Jet is Announced

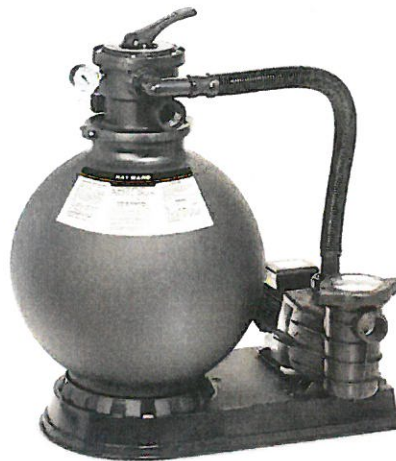

Offer a
Dynamic
new water
feature with

Hayward ColorLogic
Laminar jet.

The compact design features a locking angle adjustment and integrated flow control making the ColorLogic Laminar ideal for multiple installations along decks and patios near the edge of the pool making an illuminated stream of water visually inviting.

The ColorLogic Laminar has a simple to adjust height adjustable cover, integrated flow control and is more serviceable than any other Laminar assemblies. Hayward laminar water features offer interchangeable light options for color or white and brightness options with either a CrystaLogic or ColorLogic 320 / 160 for illumination.

VL 210 Series™ Sand Filter Systems

VL 210 Series sand systems provide the value and reliability expected from the world's leading provider of pool equipment.

The 1.5 HP pump is performance matched to the large 21" filter in an easy to install unitized base.

A VariFlo™ control valve is included and the system is built with a quiet pump and a spherical sand filter for trouble-free operation.

Contact Hayward IMG Customer Service for further details.

Hayward H-Series Legacy Models Still Available

Hayward H-Series heaters are known for their simplicity and deliver uncompromising performance and economy.

Millivolt

Featuring Cupro-Nickel fin plate heat exchanger and different ignition modes. The H-Series heaters are also available in your choice of propane or natural gas models.

Electronic

The H-Series Millivolt Heaters do not require an electric supply source. They have a standing pilot ignition system that ensures reliable lighting.

The H-Series Electronic heaters have an electronic ignition system that provides and assures reliable lighting.

These heaters are not featured in the Hayward catalog but are still available up to 400,000BTU.

ProHayward Transformers Available for Immediate Shipment

12V/300W ProHayward
Transformer

ProHayward low voltage swimming pool transformers are the preferred transformer around the world.

CE listed ProHayward transformers are designed to provide safe 12-volt electrical supply to underwater lights and low voltage fixtures of all types.

Advanced circuit protection resets automatically. The weatherproof housing features a separate wiring compartment for the fully encapsulated high and low voltage circuits.

Available in 300 & 600W as well as 12, 13 & 14V configurations.

ProHayward transformers complement Hayward lighting choices.

Hayward S244T ProSeries is the Popular Choice

Hayward ProSeries™ high-rate sand filters set the standard for performance, value and dependability.

All ProSeries™ filters are molded of durable, corrosion-proof polymeric material and feature attractive unitized tank

construction for years of trouble-free operation with only minimal care. The filters feature precision engineered umbrella-fold self-cleaning laterals for balanced flow and backwashing as well as easy serviceability.

The popular Hayward S244T 24" filter comes complete with a seven position Hayward Vari-Flo® control valve. It is also available with a six position 2" Variflo® valve.

SwimPro® Pump is the Price Fighter Offering Value and Performance

Hayward is pleased to introduce its value pump offering under SwimPro® branding.

SwimPro® is available in 50hz and 60hz and is an effective challenge to low cost pump competitors. The pump is available in ½ to 1½ horsepowers and is an ideal choice when dependable performance and value is required.

Manufactured entirely at Hayward's Wuxi, China factory to Hayward's stringent standards for quality and performance.

SwimPro® offers a better choice than non-branded alternatives with inconsistent performance and durability.

For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: img@hayward.com or go to www.Haywardpool.com
