Hayward Tandem Systems – Built Tough, Built To Last

ProSeries Plus
Tandem

Tandem Systems allow the flexibility and convenience of using the readily available Hayward equipment on larger pools and water facilities of all types.

By using tandem installation pool equipment, specifiers can design modular systems that allow for easy placement in the equipment room and convenient servicing of individual components without taking the total system off-line.

End users benefit because Hayward tandem systems offer a lower installed cost from readily available components instead of specially ordered large sized commercial systems.

Tandem installations are ideal for replacement purposes.

The tandem filtration system components are easily moved into the equipment room and assembled on site without any modifications to doorways or equipment room structure.

Contact IMG for a guide to tandem installations.

Hayward TigerShark® Robotic Cleaner

Renowned for many years for its solidity and efficiency, the Hayward TigerShark® cleans the bottom, walls and waterline.

With its ASCL microprocessor (Adaptive Seek Control Logic), it calculates the shape and size of your pool to clean

every spot efficiently.

The Hayward TigerShark® is fully automatic, with no need for an exterior bag or hose. As soon as the program is finished it automatically shuts down.

Available with foam-brush or bristle-brush, ideal for all surfaces.

Available in the Quick Clean (QC) version for full cleaning in under 2 hours. An optional caddy cart makes handling easier.

HCP 3000 Series Pump – Unrivaled Power, Unmatched Efficiency

The Hayward HCP 3000 Series pumps are the heavy-duty optimum solution for any pool delivering maximum performance and uncompromised efficiency.

HCP 3000
Series

Best in Class Performance: HCP 3000 Series pumps have longer Life and require lower maintenance: TEFC motors in all models, plus a chemical resistant Viton® seal, means less wear-and-tear and dramatically reduced down-time.

The oversized strainer basket is detachable and can be installed separately allowing for plumbing flexibility. The HCP 3000 Series Pumps deliver unmatched versatility, allowing for simple installation in virtually any pool application.

A perfect match to trusted and proven Hayward tandem systems. The HCP 3000 Series pump is manufactured in the United States at the Hayward facility in Clemmons, North Carolina.

PROHAYWARD Sealed LED Panel Underwater Light

The ProHayward 3680 Sealed LED Panel Light is available in RGB color or White light. Both models feature reliable SMD LED technology to offer long life and energy savings.

With the RGB model you get 7 fixed color choices or 8 color changing shows. With the WHT model you have the option of cool bright or warm white light.

The LED panel is resin enclosed and completely sealed from the water.

The ProHayward 3860 LED nicheless light is manufactured of rugged ABS with UV protection. The outer frame has an embossed Hayward logo.

AIRTECH Rotary Blowers - Quality Continuous Use Air Blowers

Mushroom style air blowers should not be run continuously for extended periods.

AIRTECH commercial blowers provide continuous operation.

Ideally suited for spas, clubs or luxury villas which put a high demand on spa or pool aeration, the AIRTECH rotary blowers are built with rugged die cast aluminum construction and an outboard bearing.

AIRTECH blowers run quieter and cooler than competing rotary blowers. What's more, these blowers are value priced against other rotary blowers without compromising performance or reliability. For public spa, pool and luxury pool applications, let AIRTECH blowers be your first choice in commercial blowers.
