

A SPECTRUM OF POSSIBILITIES FOR **BETTER** ILLUMINATION.

Hayward **Universal ColorLogic®** color LED lighting will transform your customers' outdoor environments.

Available in multiple cable lengths and different sizes, they are the only UL-listed lights to retrofit virtually any existing pool and spa with vibrant color.

100% brighter than any other light on the market, these energy-efficient, lights deliver spectacular color with installation versatility for new pools, spas and fountains.

The pool and spa lights can be positioned just 4 in from water level - perfect for steps, beach entries and fountains.

The 1.5-inch **Accent lights** provide low-profile, total color coordination of all water environments and complete synchronization with all Universal ColorLogic lights.

With the addition of the new **OmniDirect™** Mode, **ColorLogic®** LED lights are optimized for use with Hayward **OmniLogic®** and **OmniHub™** automation systems and the new highly rated **Omni™** app. Features of the new **OmniDirect™** mode include faster navigation to the desired color or light shows without cycling, dimming capabilities and access to 10 additional color options.

Hayward HCP3600 Series

- Value Priced Pumps

The **HCP 3600 Series** pump from Hayward Commercial Aquatics ships from the Hayward factory in Spain.

This powerful, light weight pump is made from glass-fibre filled engineered thermoplastic polymer and is suitable for salt and sea water applications. The included 75mm unions make it easy to install. The Twist Lock lid with transparent cover makes maintenance convenient.

The pump has a TEFC motor with three phase options that are IE3 compliant.

The pump is available in rated capacities of 2.5Hp, 3Hp and 3.5Hp suitable for larger pools, water features and spas.

Currently available in 50Hz only.

PARAMOUNT UltraUV2™

ULTRAVIOLET WATER SANITIZER
-Safe and Eco-Friendly

The **UltraUV2™** is easy to install in new and existing pools with multi-directional piping connections.

Water circulates through the chamber and the UV-C lamp immediately inactivates 99.9% of micro-organisms such as crypto, giardia and algae which are resistant to chlorine.

Gemicide
254 nm

This provides a cleaner, clearer swimming environment with zero harmful by-products.

The total amount of chlorine needed to maintain an adequate level of residual sanitizer reduces dramatically (a minimum residual level of chlorine should be maintained at all times).

100% corrosion resistant housing with 360° direct view lamp indicating ring lets you know the unit is on.

2-year limited warranty.

TECH NOTE

How To Read HAYWARD Serial Numbers

Hayward pumps and filters share a similar format for serial numbers which indicate the production factory and the month and year of production.

In the case of pumps, customers wrongly provide the serial number from the pump motor label which is related to the motor details.

MOTOR MODEL #

MOTOR LABEL

The serial number for pumps is on the black and silver/white label affixed to the wet end part of the pump.

The same product ID information is also located on the printed label on the outside of the packaging.

FILTER SERIAL #:
Filter manufactured 2015
(15) June (06)

PUMP SERIAL #:
Pump manufactured
2016 (16) October (10)

Providing the right serial number is important in expediting warranty claims and tracking manufacturing issues.

Hayward SV Series Solenoid Valves

Hayward **SV Series Solenoid Valves** are true union solenoid valves available in PVC and CPVC.

The valves have a corrosion resistant polyester coil and a four-position electrical connection.

Available with FPM or EPDM seals and different voltage ratings. The valves are normally closed design and rated at a non-shock 150 PSI at 70 °F.

The solenoid valve can be used in a chemical feed system with tablet feeders, to auto-fill a pool with fresh water, and in water features. The valve can also be used in non-pool applications including irrigation systems.
