

**HAYWARD® ENERGY STAR® CERTIFIED
LINEUP OF VARIABLE-SPEED PUMPS**

Hayward offers the broadest range of energy efficient variable-speed pumps in the industry. The

ENERGY STAR certified pool pumps can be 65% more efficient than conventional models, and can save pool owners lots of money in annual operating costs.

The **TriStar® VS** variable speed pool pumps are the most energy efficient according to EPA ENERGY STAR 3rd party testing data. Engineered for performance and versatility.

The **TriStar® XL** delivers increased flow from extra-large 3" unions, the removable strainer housing allows for more adaptable pump configurations, and the oversized strainer basket reduces cleaning and maintenance.

Hayward's **Super Pump® VS** variable-speed pool pumps are a drop-in upgrade for the single speed pumps.

Super Pump® VS

They feature permanent magnet, totally enclosed fan cooled (TEFC) motors that deliver maximum energy efficiency and reliability. They are exceptionally quiet compared to single speed pumps when running at maximum speeds.

The pumps are fully programmable with a touch pad control that can be rotated to four different positions or mounted to the wall for more convenient access.

The pumps can operate independently, with Hayward **Omni** automation, or with competitive systems (via relay control).

Energy-efficient equipment is absolutely essential to the future of the pool industry—and Hayward is leading the way with its leadership, innovation and commitment to environmental protection.

**UltraUV2™
ULTRAVIOLET WATER SANITIZER**
Safe and Eco-Friendly

The **UltraUV2™** is easy to install in new and existing pools with multi-directional piping connections.

Water circulates through the chamber and the UV-C lamp immediately inactivates 99.9% of microorganisms such as crypto, giardia and algae which are resistant to chlorine.

This provides a cleaner, clearer swimming environment with zero harmful by-products.

The total amount of chlorine needed to maintain an adequate level of residual sanitizer reduces dramatically (a minimum residual level of chlorine should be maintained at all times).

100% corrosion resistant housing with 360° direct view lamp indicating ring lets you know the unit is on.
2-year limited warranty.

Illuminated LED Sheers

For **BETTER** Inspiration

Illuminated LED Sheers from **Hayward®** help transform any pool into a sophisticated aquatic escape with mesmerizing water effects in a variety of colors, shapes and designs made to complement any aesthetic.

Sheer with Light inserted

The industry-first top-access light eliminates light loss, regardless of length and is available in

lengths from 1' to 8' for straight, curved or custom wall surfaces.

The addition of **OmniDirect Mode™** automation provides instant navigation to desired colors or light shows and dimming capabilities when using any of Hayward's **Omni Control Systems**.

Enhance any pool's ambience with soothing sights and sounds.

Use the sheers with **Hayward Variable Speed Pumps** for greater versatility.

H2OCHK® System

Water Testing With Your Smartphone

The **Hayward® H2OCHK®** includes test strips and an easy-to-use app that allows quick and accurate measurements, and provides historical results of 5 important water quality parameters:

Chlorine, pH, Total Alkalinity, Total Hardness and Cyanuric Acid.

The app will recommend chemical dosages for perfect water balance based on pool size.

DIP the strip in the water and **ALIGN** in app window for the new and improved camera algorithm to **READ** for accurate results all the time.

Assembled in a convenient specially designed point of sale display carton of 12 bottles with 50 strips per bottle.

Contact your local Hayward distributor to get a free trial size bottle.

AquaNaut® Series

No-Clog Suction Cleaning Solution

Hayward AquaNaut® suction cleaners are the first of their kind to clean corner to corner without clogging or getting stuck. They expertly navigate any surface while maintaining optimal suction, even when encountering tough obstacles and large debris.

V-Flex Technology features patented self-adjusting variable vanes that maximize power while virtually eliminating clogs, creating constant suction power—even at lower flow—and ensuring a complete clean every time.

V-Flex Technology

A patented adjustable roller skirt never loses suction on uneven surfaces.

The advanced design optimizes flow performance for use with Hayward **variable-speed pumps**.
